

SELECTING THE APPROPRIATE SHOWERING SOLUTION

Shower trays and wet floor trays are permanent units which require tiling or similar installation.

EasiDec Wet floor

- True level access showering area
- Installed under the floor and covered with vinyl flooring to create a whole floor showering area
- Ideal for wheeled shower chair or walk-in users
- Choice of door and enclosure options
- Gravity or pumped waste options to suit site conditions
- Ice white enclosure
- Certain models comply with DDA requirements
- Floor excavation required

Level access shower trays

- Level access shower tray for installation on most concrete or wooden floors with 17mm threshold
- Ideal for wheeled shower chair or walk-in users
- Choice of door and enclosure options
- Gravity or pumped waste options to suit site conditions
- Ice white (or contemporary brushed aluminium enclosure with safety glass - Impressions Collection see pages 76-87)
- Floor excavation required

Easy access shower trays

- Easy access shower trays sit on the floor surface without the need to remove the floor with 30mm threshold
- Ideal for wheeled shower chair or walk-in users
- Choice of door and enclosure options
- Gravity or pumped waste options to suit site conditions
- Ice white (or contemporary brushed aluminium enclosure with safety glass - Impressions Collection see pages 76-87)
- Certain models require excavation for waste

Step-in shower trays

- Ideal for step-in users with 120mm threshold (Henleydale has a 95mm threshold)
- Installation on most concrete or wooden floors
- Choice of door and enclosure options
- Gravity or pumped waste options to suit site conditions
- Ice white enclosure (or contemporary brushed aluminium panel - Henleydale see page 48)
- Certain models require excavation for waste

SELECTING THE APPROPRIATE SHOWERING SOLUTION

Shower cubicles are semi-permanent units fitted with a roof, which are free-standing. Shower cubicles are self contained and therefore no tiling is required. Normally installed within 1-2 days, no floor excavation (other than to connect gravity waste versions) is required* and a ramp is provided. Removable for recycling.

100MK2 shown

Front Entry Shower cubicles

- Shower chair accessible Front Entry models (except 75 model)
- Gravity or pumped waste options
- Shower Toilet model available - combines a toileting facility with a shower (includes toilet and hand basin)
- Grab rails fitted as standard
- Trifold and single alcove door options
- Shower seat option
- Light/extractor fan option
- Half height side panel option

*The 100MK2 model can be recessed into floor if required to provide a level access shower cubicle or cubicle toilet

Side Entry Shower cubicles

- Suitable for side transfer (not wheelchair accessible)
- Gravity or pumped waste options
- Shower Toilet model available - combines a toileting facility with a shower (includes toilet and hand basin)
- Grab rails fitted as standard
- Trifold and single alcove door options
- Shower seat option
- Light/extractor fan option
- Half height side panel option

Corner cubicle

- Low entry height - 50mm (2") for walk-in users
- Pumped waste (no gravity option)
- Grab rails fitted as standard
- Single half, double half and full height door options
- Shower stool option
- Light/extractor fan option
