OVERHEAD HOISTS

Explanation of Wispa overhead hoist options

Wispa 100 Plus hoist range

Maximum Load 130kg (20 stones) (286lb) Standard models

Maximum Load 200kg (31 stones) (440lb) Turbo models

- Up/down/traverse/X-Y options
- Battery or transformer models (transformer models have no battery to recharge) and are ideal for tracks up to 3 metres
- Infra-red hand control options
- Battery models 60 lifts per charge (based on average 70kg patient weight)

Wispa Max hoist range

Max Load 272kg (42 stones) (598lb)

- Up/down/traverse/X-Y options
- Battery operated
- Infra-red hand control options
- Up to 200 lifts per charge (based on average 70kg patient weight)

A detailed Specifiers Guide is available to Architects and scheme specifiers.
Please call customer services on 01869 365500 opt 1 to obtain a copy

OVERHEAD HOISTS

Wispa 100 Plus hoist range

Maximum Load 130kg (20 stones) (286lb) Standard models

Maximum Load 200kg (31 stones) (440lb) Turbo models

- Power options to suit
- Economical but simple to recharge
- Safe, controlled handling
- Emergency stop with reset facility
- Emergency lowering
- Lift motor has a self lock facility
- Tested to the durability section of British Standard 10535 with 11 thousand lift and lower tests
- Installation quotation subject to site survey

OVERHEAD HOISTS

Wispa 100 hoist with X-Y Installation

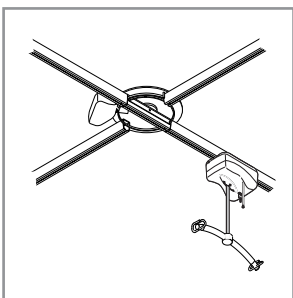

OVERHEAD HOISTS

Manual turntable

- The manual turntable is designed to allow a Wispa ceiling track hoist to be rotated, enabling the hoist to transfer from one track to another.

code	product	description
OHTRK12A	Manual turntable	with 1m track (c/w tails x 3)
OHA0048AR	Additional tail (1m)	right hand

Powered turntable

Maximum Load 272kg (42 stones) (598lb)

- The powered turntable is designed to allow a Wispa ceiling track hoist to be rotated, enabling the hoist to transfer from one track to another.
- Easy operation via handset control
- Modified hoist required (cannot be used with WispaLite)

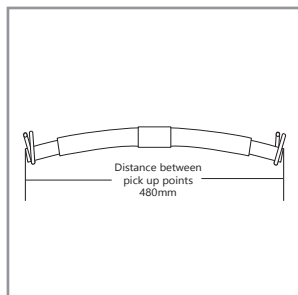

code	product	description
OHTRK12ELA	Powered turntable	with 1m track (c/w tails x 3)
OHA0048AR	Additional tail (1m)	right hand

Note: Track can be cut to size on site.

A detailed Specifiers Guide is available to Architects and scheme specifiers. Please call customer services on 01869 365500 to obtain a copy

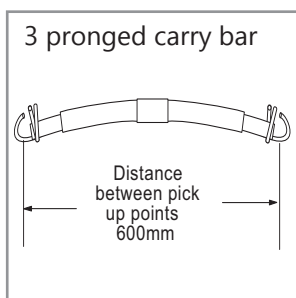

OVERHEAD HOISTS

Wispa hoist standard carry bar
Maximum Load 272kg (42 stones) (598lb)

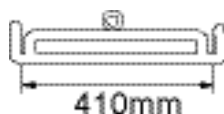

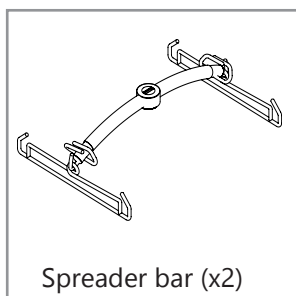

- Only approved for use on Chiltern Invadex ceiling track hoists

code	product
OHCB2-000	Standard carry bar

Wispa hoist 3 pronged carry bar
Maximum Load 272kg (42 stones) (598lb)

- The 3 pronged carry bar when used with the spreader bar offers a wider pick-up distance for added client comfort. The 3 pronged carry bar also offers a third attachment point, if required.
- Only approved for use on Chiltern Invadex ceiling track hoists

code	product
OHCB3-000	3 pronged carry bar
OHHS136	spreader bar (sold in pairs)

Hoist Weigh Module

Class III certified, the weigh module is approved for use in hospitals, nursing homes and other care environments where medication is determined by weight measurement.

- Suitable for use with ceiling hoists featuring a three prong hook configuration.
- Easy to read digital screen
- 200kg weighing capacity in 100g graduations
- BMI calculation function
- Rechargeable battery with upto 40 hours continuous use
- Low battery warning

code	product
WM0010	Weigh module
WM0011	Storage/carry case

A detailed Specifiers Guide is available to Architects and scheme specifiers. Please call customer services on 01869 365500 to obtain a copy

GANTRY SYSTEMS

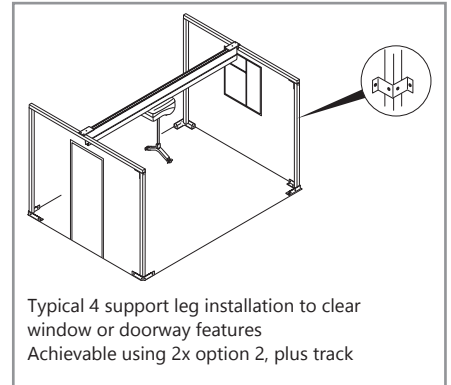

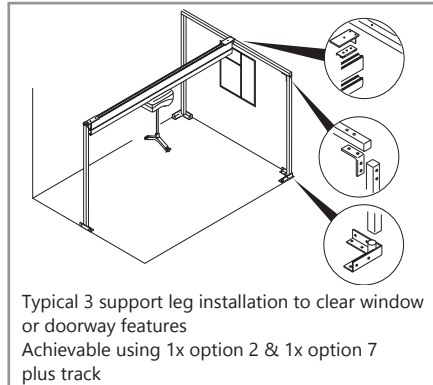

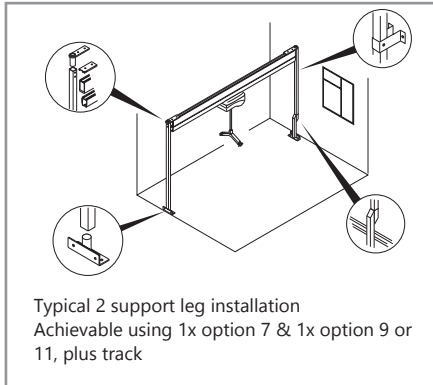

Normally a ceiling track hoist would be fitted to the ceiling, but the construction of some rooms can make the fixing of a system difficult and a modular, portable or heavy duty gantry system may be more appropriate.

Modular gantry systems

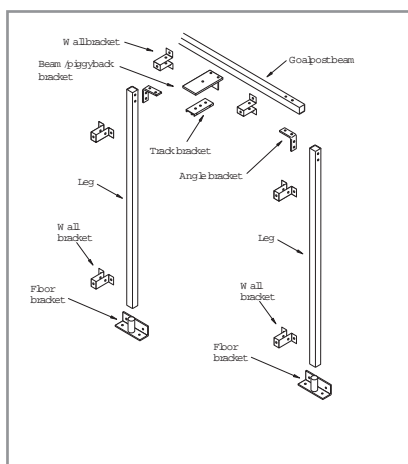

To overcome a plasterboard false ceiling a Modular Gantry system is a practical answer. Featuring wall and floor brackets, allowing the gantry legs to be positioned mid-wall, and additional legs to straddle windows and doorways, the Gantry system offers maximum flexibility, resolving many construction anomalies. It can support users up to 200kgs (30 stones) (440lb) over a 3 metre span of track, providing the floor construction is adequate (above this weight a heavy duty gantry system is required). The standard leg length is 3 metres and can be cut on site to suit requirements. Please contact Chiltern Invadex to arrange a site visit.

It can also be positioned to allow the hoist to traverse at an angle across the room, for example from a bed to a toilet, or to accommodate the room layout. The offset leg option enables obstructions such as pipework or skirting boards to be cleared.

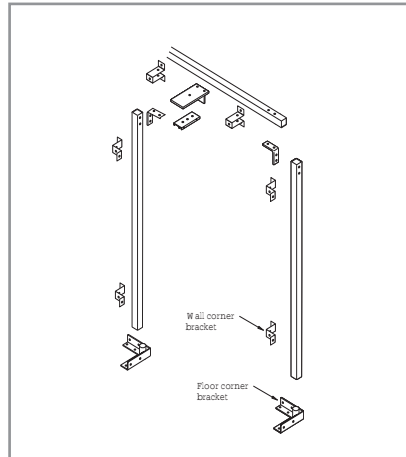

Goal post kits to span windows and doors Maximum Load 200kg (31 stones) (440lb)

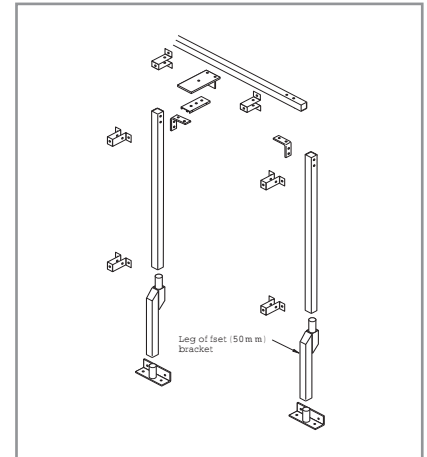

Kit contents: as detailed below. Goal post kits do not include track. For single legs see page 15

Chiltern Invadex modular gantry systems are available with 65mm or 115mm wall bracket options

code	product
303-00110	Legs/Top & Corner Floor Bracket/65mm Corner Wall Bracket/100mm Offset
303-00112	Legs/Top & Corner Floor Bracket/115mm Corner Wall Bracket/100mm Offset

T FRAME GANTRY

- Designed for use with the WispaLite portable hoist (see page 12)
- Perfect for bed to chair transfers
- Totally self supporting with no need for wall or floor fixing methods
- An affordable alternative to a permanent track installation
- No power supply required
- Ideal temporary solution
- Adjustable height from 2060mm to 2380mm
- Track length 2500mm
- A simple modular style construction allows a light weight and transportable system
- Maximum load 200kg (31 stone)

code	product

TRACK & ACCESSORIES

Straight track

- Standard straight track
- 2.5, 3, 4 and 5m length options
- Cut lengths upto 5m available on request

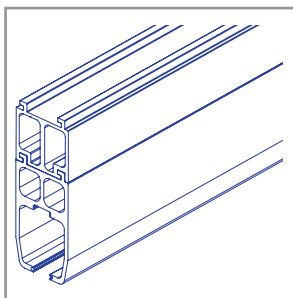

code	product	description
OHTNP-25	Straight track	2.5m length
OHTNP-3	Straight track	3m length
OHTNP-4	Straight track	4m length
OHTNP-5	Straight track	5m length

Combined track

Our standard track profile combined with an additional reinforced element to allow longer free spans between wall brackets, gantry legs or X-Y beams.

code	product	description
OHTNP-25C	Combined track	2.5m combined track
OHTNP-3C	Combined track	3m combined track
OHTNP-4C	Combined track	4m combined track
OHTNP-5C	Combined track	5m combined track

Piggyback Track

Box section for use with combined track to increase unsupported length

code	product	description
OHTNP-25C	Combined track	2.5m combined track

Busbar

- Busbar strip which can be installed into straight track to provide continuous charge to track hoists (excluding the wispalite)
- Prevents the need for hoist docking
- Requires straight or combined track (see above)

code	product	description
OHTNP-BUSB	Busbar	purchased in 1m lengths

X-Y TO MONO SYSTEMS

The X-Y to Mono transfer system maximises room coverage, reducing the need for manual handling of clients. The system is configured to connect an X-Y system to a mono track, allowing the hoist to travel through a doorway and to other rooms or to join another X-Y system.

Notes: With all XY-Mono systems it is necessary to specify piggy back for use on the moving XY beam.

The XY-Mono cassettes shown below should be ordered in addition to the normal track, piggy back, XY trolleys, buzz bar and fixing components.

Chiltern Invadex X-Y to Mono systems can be configured to suit specific client requirements. A number of typical scenarios are shown below. Please contact Customer Service for specific details or to arrange a visit by a Technical Sales Representative.

X-Y to mono

- Travel from moving X-Y beam on to a fixed mono track

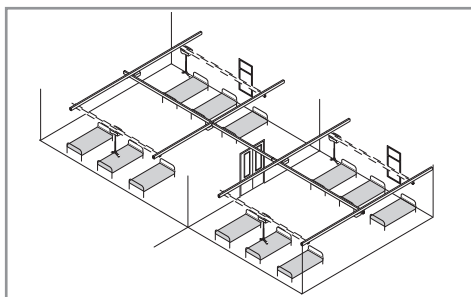

code	product
310-00093	X-Y to Mono Assembly (RH X-Y cassette & LH mono cassette)
or	
310-00094	X-Y to Mono Assembly (LH X-Y cassette & RH mono cassette)

SYMBOLS: Bulk item
Made to order
Anti-microbial coating
(see P68 for details)

Tel: 01869 365500 Email: sales@chilterninvadex.co.uk
www.chilterninvadex.co.uk

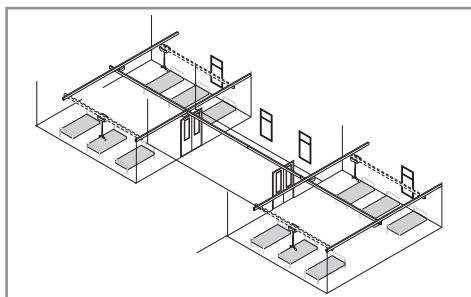

X-Y TO MONO SYSTEMS

X-Y to mono to X-Y (short length)

- Travel from moving X-Y beam onto short length of fixed track, typically through a doorway and onto another moving X-Y beam.
- Mono track less than 2.5m length

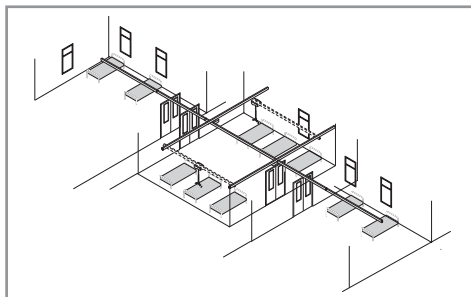

code	product
310-00092	X-Y to Mono to X-Y Assembly (RH X-Y cassette, double ended mono cassette, LH X-Y cassette)

X-Y to mono to X-Y (extended length)

- Travel from moving X-Y beam, onto an extended length of fixed track typically down a corridor and onto another moving X-Y track

code	product
310-00093	X-Y to Mono Assembly (RH X-Y cassette & LH mono cassette)
and	
310-00094	X-Y to Mono Assembly (LH X-Y cassette & RH mono cassette)

Mono to X-Y to mono

- Travel from fixed track onto moving X-Y beam and off to another fixed track

code	product
310-00093	X-Y to Mono Assembly (RH X-Y cassette & LH mono cassette)
and	
310-00094	X-Y to Mono Assembly (LH X-Y cassette & RH mono cassette)

WISPA UNIVERSAL SLINGS

A. Select your sling

SLU

Universal Sling

- Good support for legs, shoulders and back
- Easy to fit and remove with slide sheet material on rear of legs
- Four fabric options
- Positioning handles and pocket on reverse
- Commode aperture for toileting

SLUD

Full Support Universal Deluxe

- Good support for legs, shoulders, back and head
- Shaped, padded head support
- Easy to fit and remove with slide sheet material on rear of legs
- Four fabric options
- Positioning handles and pocket on reverse
- Commode aperture for toileting

B. Select your fabric

- 1 Quilted Polyester
- 2 Unquilted Polyester

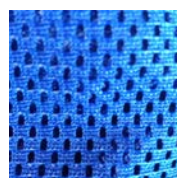

Polyester

A hardwearing close weave fabric. Providing a comfortable smooth finish. Quilted and unquilted options.

Safe working load: 400kg

- 3 Quilted Royal Net
- 4 Unquilted Royal Net

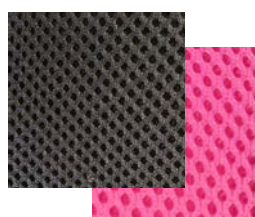

Royal Net

Ideal for bathing, the Royal Net material has thousands of tiny drainage holes. Quilted and unquilted options.

Safe working load: 300kg

- 5 3D Spacer

3D Spacer

State of the art material which adapts to the shape of the users body. Used for in-situ slings the fabric offers pressure relief, heat dispersion and moisture wicking properties.

Safe working load: 300kg

- 6 Parachute

Parachute

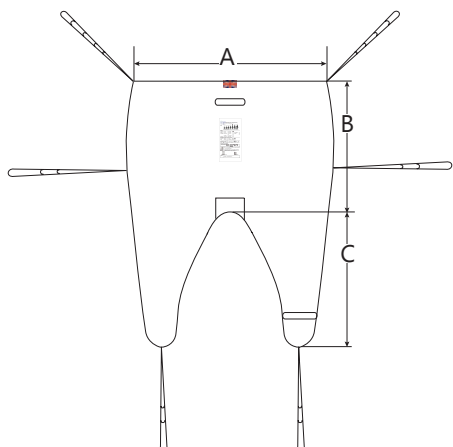

Silky, soft material which is light and provides little friction during application/removal of the sling.

Safe working load: 200kg

WISPA HAMMOCK SLINGS

A. Select your sling

SLSH

Standard Hammock/Amputee Sling

- Excellent support for head/neck, shoulders, back, hips, buttocks and thighs
- Support for upper thigh and hip means that the sling is suitable for hoisting clients with above knee amputations
- Unquilted
- Available with toileting aperture - to special order

SLCH

Classic Hammock Sling

- Designed to provide a comfortable lift and reduce hip movement
- Toileting aperture
- Slide sheet material on rear of legs to aid fitting & reduce friction
- Available with head support - to special order

B. Select your fabric

1 Quilted Polyester (SLCH model only)

2 Unquilted Polyester

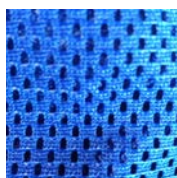

Polyester

A hardwearing close weave fabric. Providing a comfortable smooth finish. Quilted and unquilted options.

Safe working load: 400kg

3 Quilted Royal Net (SLCH model only)

4 Unquilted Royal Net

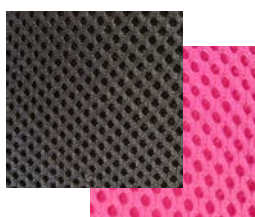

Royal Net

Ideal for bathing, the Royal Net material has thousands of tiny drainage holes. Quilted and unquilted options.

Safe working load: 300kg

Technical Information

Size & Weight Range Guide (approx.)

This chart provides only an approximate indication of sling size based on patient weight. A full risk assessment is recommended to ascertain the most suitable size of sling based on patient's measurements and conditions rather than weight alone.

SHOWER CHAIRS
SHOWER TROLLEYS & STRETCHERS
SHOWER CRADLES
PAEDIATRIC RANGE

SHOWER CHAIRS - TRANSAQUA

The TransAqua range of shower commode chairs has been developed to provide a modular bathing and toileting solution which can be easily adapted to alter with the user. The chairs innovative modular design allows each component to be retrospectively replaced as the users needs change or to facilitate re-issue. Seats, armrests and footrests are interchangeable, the width of the frame can be increased/decreased* and the chair can be converted from self propelled to attendant propelled and vice versa. Height adjustable by the use of extension pins (available to order) by 25mm or 50mm reducing the need for a replacement frame.

* replacement backrest, cross member and seat required.

Main Features

- Safe working load 200kg (31st) (440lb)
- The chair features a stainless steel frame with corrosion resistant wheels and castors.
- Armrests and footrests swing away to aid transfer.
- Several footrest options are available, each is height adjustable to ensure that the user is in a comfortable position.
- Seats are available as flat padded, full ring aperture or horseshoe with a range of aperture sizes to suit the user.
- Can be used over a toilet or provided with a commode pan and cradle.
- 19" and 21" chairs are Clos-o-mat compatible.
- Self propelled models can be provided with 20", 22" or 24" wheels.
- Attendant propelled models are provided with four braked castors, directional locking castor available on request.

SHOWER CHAIRS - AQUAMASTER BARIATRIC (TO SPECIAL ORDER)

The AquaMaster A13 is a bariatric version of the popular A06 attendant propelled shower chair, redesigned for the requirements of bariatric clients. Part of the AquaMaster shower chair range it features a rigid one piece frame with interchangeable seat, backrest, arm and footrest options.

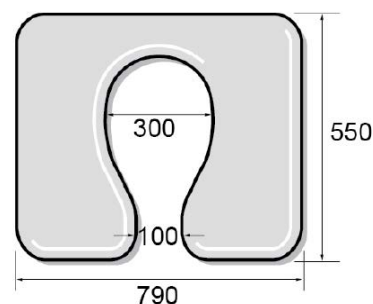

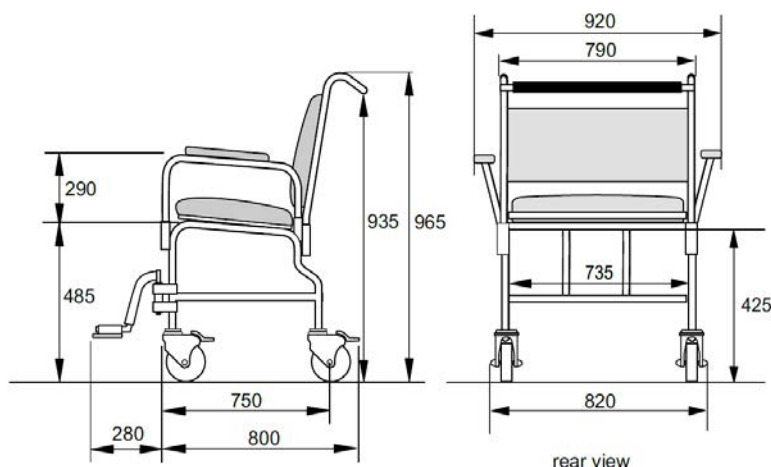

Seat, backrest padding and armrest pads are manufactured with the use of pressure relief foam to aid comfort when seated at no additional cost (a vinyl backrest fabric can be supplied if the pad is not required)

Heavy duty twin wheeled castors and heel straps fitted to each removable and height adjustable footplate help to aid both user and care teams to provide comfort and security when in use, a full length close cell foam grip allows the chair to be manoeuvred comfortably when in use.

- Safe working load of 55st
- Rigid one piece frame
- Pressure relief foam
- Large castors
- Padded, comfortable push handle
- Large horseshoe seat as standard, large aperture and flat padded available on request.

PAEDIATRIC RANGE

PAEDIATRIC RANGE – SLINGS

Paediatric Sling Range

The Chiltern Invadex sling range offers a number of paediatric sizes in various fabrics and colours to make the hoisting experience less clinical. Each model and fabric range has been extensively tested to ensure the comfort and safety of the user.

For full details of sizing and order codes please see pages 24-32

We now offer the following paediatric ranges;

-  Universal - a general use sling offering good lower body support.
-  Universal Deluxe - a full support sling providing boned, padded head support.
-  Deluxe Hammock - offers secure, comfortable fit around the hips, with toileting aperture.
-  Extensor Hammock - Deluxe hammock with extensor straps and padded head support.
-  In-Situ Hammock - an in-chair spacer sling provided with strap pockets.
-  Classic Toileting - a classic toileting sling with wide padded legs for comfort.
-  Deluxe Toileting - classic toileting sling with extensor straps and head support.
-  Full Support Toileting - toileting sling with self tightening body straps, allowing users arms to remain inside the sling during transfer.

In addition to standard blue polyester, paediatric slings are offered in mesh and 3D spacer fabrics, colour options are also available.

Cartoon fabrics* can be used to line the slings providing visual stimulation and a sense of personalisation.

Where a child has specific needs, we are able to produce custom made slings to ensure that they feel secure and comfortable during transfer. For a full product brochure or to request a survey/demonstration visit please contact customer services on 01869 365500 Opt 1 or email us at sales@chilterninvadex.co.uk.

*cartoon fabrics vary, please contact customer services for details of current stock.

Chiltern slings have been developed to complement the Wispa range of hoists, however can be used with various two and three prong spreader bars (subject to assessment of risk).

The Wispa 100+ can now be customised using a sticker pack which can be provided to enable the child to print their own image and apply to the hoist sides.

PAEDIATRIC RANGE – SHOWER CHAIR

AquaMaster Paediatric Shower Chair

The paediatric shower chair has all of the features of the popular AquaMaster range, perfectly proportioned to suit paediatric use. A large range of side pads, thoracic supports and support straps allow the chair to be adapted to suit smaller children. The paediatric chair is available with numerous frame colours.*

The AquaMaster range of shower commode chairs provides a rigid one piece base frame with modular elements to allow easy replacement of components to suit the users changing needs. Seats, armrests and footrests which are interchangeable. The chair also features a wide range of accessories and is available as a made to measure piece of equipment, specially manufactured at our Oxfordshire facility to meet individual needs. The coated frame features an anti-microbial element which is proven to destroy 99.9% of harmful bugs including MRSA.

Main Features

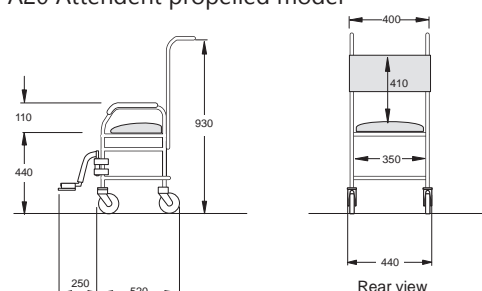

- Safe working load 130kg (20st) (286lb)
- The chair features a rigid one piece base frame.
- Removeable armrests and footrests swing away to aid transfer.
- Several footrest options are available, each is height adjustable to ensure that the user is in a comfortable position.

- Seats are available as flat padded, full ring aperture or horseshoe with a range of aperture sizes to suit the user.
- Options extended seats and pressure relief foam.
- Optional commode pan and cradle or sliders available
- Option for 20" or 22" self propelling wheels
- Attendant propelled models are provided with four braked castors, directional locking castor available on request.
- Each model can be manufactured as a bespoke, user specific model (subject to site survey)

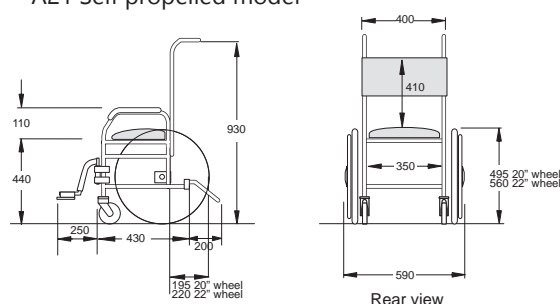

*please call us for a colour chart.

GENERAL INFORMATION

Delivery policy

Chiltern Invadex products are normally available from stock with the following exceptions:

1. Products which are Made to Order are shown with a  symbol. Lead times can range from 7 days for standard product to 6-8 weeks for bespoke products, dependent upon the scope of the specification changes. Please call customer services on 01869 365500 Opt 1, for details of specific products
2. Oversized or bulk items are shown with a  symbol and may attract additional carriage charges. Delivery times may differ from our standard terms, please refer to customer services for details.
3. Additional delivery options such as timed deliveries are available at an additional charge. This requirement must be advised at time of order and may not be available for oversized items or for the Scottish Highlands and Islands. Please call for details.

Anti-microbial Coating

Items which are identified by a  symbol are rust free stainless steel coated with Talisman 30ES AM performance polymer alloy which includes a silver anti-microbial additive to reduce levels of MRSA by at least 99.9%

Surveyor visits

Chiltern Invadex has a Nationwide team of experienced representatives who are able to make site visits to assist in the specification of equipment and provide quotations.

Surveyor visits are available at no charge and are non-obligation. To arrange a visit please contact customer services on 01869 365500 Opt 1.

Specification changes

As part of our commitment to new product development we reserve the right to alter specifications without prior notice.
